Possible causes for the decline in Adélie Penguin population numbers at anvers island, Western antarctic Peninsula

Published On: May 27, 2019 | Pages: 006 - 010

Author(s): Christopher Gallacher*

The impacts of climate change are evident even at the most remote places on the planet. This is especially apparent on the isolated Western Antarctic Peninsula (WAP). Anvers island, located on the WAP, has historically had low humidity and extremely low temperatures. Also, regular seasonality maintains equilibrium within the entire system, from which organisms evolved ...

The evolution of containerization and its impact on the Maghreb ports

Published On: February 16, 2019 | Pages: 001 - 005

Author(s): Arbia Hlali* and Sami Hammami

This paper studied the evolution of container traffic in the global world and its impacts on the seaports Maghreb region (Tunisia, Algeria and Morocco). The containerization transformed the ports sector from one generation to another and developed the international trade between regions. The descriptive analysis realized in this study shows the interested impact of co ...
