**The experience of internal and external supporting objects from the perspective of six young women who have lost a parent to cancer- An interpretative phenomenological analysis**

Published On: September 21, 2017 | Pages: 024 - 032

Author(s): Nilsson D*, Johansson E, Larsson K, Näslund J

**Background:** Adolescents losing a parent are a risk group for future complications in their ongoing live such as higher rate of mortality, self-harm and other mental health problems. There is a lack of knowledge in what, how and when to offer help as well as no concluding theoretical model to understand the whole process of losing a parent. The objective of this study ...
Aim: Adolescents with eating disorders frequently present late for treatment or not at all. This study aimed to determine whether there were any identifying characteristics of adolescents with eating disorders that might assist health care professionals with earlier detection.

Deaths from opioid overdose in the United States doubled between 2000-2014. An increase in prescription opioid drug-induced fatalities parallels a rise in the frequency of these medications being prescribed.

Charles Bonnet Syndrome (CBS), also known as visual release hallucinations is the experience of complex visual hallucinations in an individual with partial or severe blindness. It is an uncommon disorder with a worldwide prevalence ranging between 0.5%- 40%. However, the prevalence in Africa is largely unknown due to unavailability of reliable statistics.
A Child of Wilson’s Disease Presenting with Coprolalia

Published On: February 11, 2017 | Pages: 001 - 002

Author(s): Bhavuk Garg and Sumit Kumar Gupta*

Wilson’s disease is a rare autosomal recessive genetic disorder of copper metabolism. Neurological and psychiatric manifestations can be a presenting manifestation of Wilson’s disease. We describe a case of a 13 year old child diagnosed with Wilson’s disease who presented with coprolalia (complex vocaltics). ...

Mobile Phone for Mental Health

Published On: February 28, 2017 | Pages: 003 - 003

Author(s): Tanjir Rashid Soron*

The rapid growth of information communication technology (ICT) has brought new hope for people with mental illness who were beyond health and social service for long time. ...
