Robotic Modified Orr-Loygue Rectopexy for Internal and External Rectal Prolapse

Published On: March 11, 2017 | Pages: 001 - 003

Author(s): Arifa Siddiqa* and Shahab Siddiqi

Laparoscopic ventral mesh rectopexy is the gold standard treatment for external rectal prolapse and an excellent treatment for symptomatic internal rectal prolapse. However, there is a recurrence rate for this procedure, part of which can be attributed to the untreated posterior rectal prolapse component. ...
