Long Pentraxin PTX 3 and Faecal Calprotectin as a Non Invasive Biomarkers for Ulcerative Colitis

Published On: February 10, 2017 | Pages: 011 - 016

Author(s): Sherif Ezzat, Amal Selim and Mohamed Abd El-Raouf Tawfi k*

Background and Study Aims: as there is no single golden rule for the diagnosis and activity of ulcerative colitis disease, this study is going to discuss the clinical relevance of calprotectin and PTX 3 in cases of ulcerative colitis and their roles as non-invasive methods to diagnose UC and determine disease activity.

State of Art Update: Detection and Classification of Early Colonic Neoplasia

Published On: March 24, 2017 | Pages: 021 - 026

Author(s): K McWhirter, R George and Y Ang*

Colonoscopy has been shown to be effective in the detection and removal of precancerous lesions and early cancers, and as a result, colorectal screening programs are in preparation, or in place throughout the world. Screening efforts are reducing the incidence of colorectal cancer (CRC) and allow diagnosis CRCs at an earlier stage.

Pneumatosis Cystoides Intestinalis: Report of a New Case of a Patient with
Pneumatosis cystoides intestinalis (PCI) is an uncommon entity without the characteristics of a disease by itself and it is characterized by the presence of gas cysts within the submucosa or subserosa of the gastrointestinal tract. ...
