Long non-coding RNA HOXA11-AS facilitates cell migration and invasion by regulating microRNA-148a/WNT1 axis in gastric cancer

Published On: July 23, 2019 | Pages: 019 - 026

Author(s): Tao Guo, Xiao Yuan, De-Feng Liu, Shi-Hao Peng and A-Man Xu*

Recently, long non-coding RNAs (lncRNAs) have emerged as crucial players in the initiation and progression of multiple cancers including gastric cancer (GC). LncRNA HOXA11 antisense RNA (HOXA11-AS) has been found to be an oncogenic factor in GC. However, the molecular mechanisms responsible for these oncogenic properties have not been thoroughly elucidated. ...

Mixed Adenoneuroendocrine Carcinoma of the Ampulla of Vater

Published On: May 29, 2019 | Pages: 011 - 014

Author(s): Gabriel Carneiro Fernandes Fonsêca*, Marcelo Gonçalves Sousa, Rômulo Gioia Santos Júnior, Gabriela Albuquerque Batista de Araújo and Marcelo Moura Linhares

Introduction: In 2010, World Health Organization defined mixed adeno-neuroendocrine carcinoma as rare tumor with two malignant components: neuroendocrine and adenocarcinomas. A rare mixed adenoneuroendocrine carcinoma of the ampulla of Vater was diagnosticated in this report. Methods: Diagnosis, surgery and follow-up performed at the Surgical Clinic Service of the L ...
A study of post-operative complications of all emergency laparotomy in a tertiary care hospital within 90 days

Published On: July 10, 2019 | Pages: 015 - 018

Author(s): AR Bansal, Manas Ranjan Mallick* and Suvendu Jena

Introduction: An emergency laparotomy is a life saving procedure undertaken mostly in acute cases without much preparation of the patient. Despite being one of the most common urgent surgical procedures, it still proves to be a challenge for the surgeons of the world. ...
