Mucinous adenocarcinomas arising from a retro-rectal hamartoma: Unusual malignant transformation of a tailgut cyst

Published On: November 27, 2019 | Pages: 031 - 033

Author(s): María Recuero Pradillo*, Carlos Quimbayo-Arcila, Beatriz Moreno Torres, Angel Romo Navarro, Juan Sebastian Malo Corral and Juan Ruiz Martin

Retrorectal cystic hamartomas, or tailgut cysts, are rare congenital lesions that are usually present as tumors with a considerable size in presacral area. Frequently, these lesions are asymptomatic so the diagnosis may be delayed. ...
