Pediatric Bartter syndrome: The therapeutic challenge

Published On: February 06, 2020 | Pages: 005 - 009

Author(s): Aamir Jalal Al Mosawi*

Background: There is no curative therapy for many of the rare genetic disorders such as Bartter syndrome. Many patients with such disorders will be treated to a large extent with symptomatic therapies, and many of them will continue to have some symptoms, and growth and mental retardation despite the traditional therapies generally known by the treating physician. Bec ...

Tunneled femoral catheters and tunneled jugular catheters, our experience, efficacy and complications
Author(s): Iyad Abuward Abu-Sharkh*, Suleyka Puelllo Martinez, Luisa Janeiro Moas, Nisrine Arhda, Manuel Fidalgo Diaz, Anabertha del valle Narvaez Benitez, Rafael Alonso Valente and Candido Diaz Rodriguez

Background: The replacement of the arterio-venous fistula with PTFE prostheses or central tunneled catheters is increasing due to the early exhaustion of autologous native accesses. The percentage of patients with tunneled catheters as vascular access for hemodialysis reaches between 15 to 25%, therefore, it is essential to improve the techniques used to avoid early a...
