My Child Doesn't Need to be Vaccinated Because We Lead a Healthy Lifestyle: Compensatory Health Beliefs Predicting Intentions and Reported Child Vaccination

Published On: October 29, 2015 | Pages: 022 - 025

Author(s): Efrat Neter*, Bat-El Levi and Sharon Miller

Background: In the past two decades negative attitudes towards vaccination has surfaced among parents. These concerns are related to safety, adverse effects, lifestyle and religious issues. The present study focuses on compensatory health beliefs (CHBs), the beliefs that the adverse consequences of one health behavior are compensated by another health behavior, and ex ...

Risk-Adjusted Models of Costs Referable to General Practitioners Based on Administrative Databases in the Friuli Venezia Giulia Region in Northern Italy
