An analysis of the practices of caesarean section in sub-Saharan Africa: A summary of the literature

Published On: August 24, 2019 | Pages: 077 - 086

Author(s): Michel Dikete*, Yves Coppeters, Philippe Trigaux, Yvon Englert, Philippe Simon and W Zhang

Introduction: Ensuring access to quality caesarean sections (CS) is a challenge for the next millennium and a sustainable development goal to reduce maternal and infant mortality. A CS involves risks and complications and should therefore be performed in an approved way and not used excessively.

Sedentarism and Metabolic Syndrome: Broadening the measurement of sedentarism

Published On: August 20, 2019 | Pages: 069 - 076

Author(s): Lucélia Cunha Magalhães*, Silva DO, Araújo MJ, RN Lessa I, Almeida Filho N, Aquino EML

The metabolic syndrome (MS) is a combination of cardiovascular risk factors, including visceral obesity, low HDL cholesterol level, increased triglycerides, hyperglycemia and high blood pressure. This sequence of risk factors contributes towards the development of atherosclerotic cardiovascular disease (ACVD) and diabetes mellitus.
