Physician Death by Suicide: Problems Seeking Stakeholder Solutions

Published On: May 25, 2016 | Pages: 020 - 025

Author(s): Tracy D. Gunter*

Each year approximately 400 physicians die by suicide in the United States, leaving an estimated one million patients without their physicians [1-5]. Physicians are two to three times more likely to die by suicide than members of the general population and are more likely to die by suicide than other professionals [6,7]. ...
issue by diminishing the methodological flaws that hinder the internal and ecological validity of previous studies. ...

**From Black Bile to the Bipolar Spectrum: A Historical Review of the Bipolar Affective Disorder Concept**

Published On: May 05, 2016 | Pages: 010 - 015

Author(s): Justin Thomas* and Ian Grey

The terms melancholia and mania have their etymologies in classical Greek. Melancholia is derived from ‘melas’ (black) and ‘chole’ (bile), highlighting the term’s origins in pre-Hippocratic humoral theories [1]. Where depression/melancholia was viewed as an excess of black bile, the humoral perspective saw mania as arising from an excess of yellow bile [2], or a mixtu ...

**Music Intervention Can Improve Emotion in Cancer Patients during Disease Progression**

Published On: March 28, 2016 | Pages: 007 - 009

Author(s): Lei Jia, Jianping Chen*, Rainbow Th Ho, Jin Yu, Li Guo and Li Li

Music has long been regarded to aid health and loss-adaptation, but effect of music intervention on cancer patients is not well-understood. The aims of this study are to summarize and describe the role of music before and after diagnosis. ...
