History of depression through the ages

Published On: May 06, 2020 | Pages: 010 - 018

Author(s): Michel Bourin*
Depressive thoughts appeared from the origins of Humanity. They are found in philosophical writings and in literature since Antiquity. They have been approached in a religious or medical way since always, with conceptions which sometimes mixed physiological and mystical explanations. With the advent of psychiatry as a medical discipline, depressive disorder was includ ...

Oxytocin and the role of “regulator of emotions”: Definition, neurobiochemical and clinical contexts, practical applications and contraindications

Published On: April 10, 2020 | Pages: 001 - 005

Author(s): Giulio Perrotta*
In the field of neuroscience applied to emotions and affects, some hormones have been studied for their relational and social activation capacity. Among these, the peptide hormone called oxytocin, long known for the induction of birth contractions and other physiological functions, is involved in attachment, confidence and reduction of anxiety, facilitat ...

Posttraumatic stress disorder concerning the end of the covid-19 lockdown: A
Posttraumatic Stress Disorder (PTSD) occurs generally two months after an acute stress. We challenge the opportunity to observe an increase of PTSD after the end of the confinement induced by the pandemic of covid-19. PTSD can develop in response to exposure to an extremely stressful or traumatic event, or an exceptionally threatening situation. Examples include rape, ...
