Applying IT-Related Business Process Reengineering In an Informatics Course for Graduate Nursing Programs

Published On: December 16, 2015 | Pages: 016 - 024

Author(s): Azizeh K. Sowan*

Introduction: Studies on methods of teaching informatics for graduate nursing programs are limited. This paper discusses the design and evaluation of an IT-related Business Process Reengineering (BPR) Project, one of the main assignments in an informatics course offered jointly for three graduate nursing programs. Challenges and lessons l ...
Background: Men and women are differently bodily, as well as have distinctive ways of thinking; consequently, their health care needs are not always the same. For some older adults who enter long-term care facilities, the impact of gender upon their care may not be recognized by staff. ...

Health Behaviors of Centenarians are Worth Attention

In contemporary society, it’s important to prevent and minimize the impact of non-communicable disease [1]. Health behaviors, such as physical inactivity, smoking, obesity, poor diets, and alcohol misuse are among the most common causes of disease and premature deaths in the world [2, 3]. With the development of the economy and the level of medical...

Preventing Postoperative Healthcare Associated Infections: The Experience of Two European Cardiac Surgery Intensive Care Units

Aims: to investigate the relationship between nursing workloads (first shift) and Healthcare-associated Infections (HAI) in two European Cardiac Surgery Intensive Care Units (ICUs)....
