Applying IT-Related Business Process Reengineering In an Informatics Course for Graduate Nursing Programs

Published On: December 16, 2015 | Pages: 016 - 024

Author(s): Azizeh K. Sowan*

Introduction: Studies on methods of teaching informatics for graduate nursing programs are limited. This paper discusses the design and evaluation of an IT-related Business Process Reengineering (BPR) Project, one of the main assignments in an informatics course offered jointly for three graduate nursing programs. Challenges and lessons ...
Background: Men and women are differently bodily, as well as have distinctive ways of thinking; consequently, their health care needs are not always the same. For some older adults who enter long-term care facilities, the impact of gender upon their care may not be recognized by staff.

**Health Behaviors of Centenarians are Worth Attention**

Published On: August 05, 2015 | Pages: 015 - 015

Author(s): Xianglong Xu*

In contemporary society, it's important to prevent and minimize the impact of non-communicable disease [1]. Health behaviors, such as physical inactivity, smoking, obesity, poor diets, and alcohol misuse are among the most common causes of disease and premature deaths in the world [2,3]. With the development of the economy and the level of medical...
