The effectiveness of nursing intervention on breastfeeding-related problems among nursing mothers in selected primary health clinics in Lagos, Nigeria

Published On: November 15, 2018 | Pages: 014 - 019

Author(s): Folami F*, Ademuyiwa Y and Olowe A

Breastfeeding is a vital component of realizing every child’s right to the highest attainable standard of health, while respecting every mother’s right to make an informed decision about how to feed her baby. Several factors related to the mother and the baby has a negative effect on the duration of exclusive breastfeeding. Most breastfeeding mothers have experienced ...
Objectives: Evaluation of the quality of life for patients with total hip arthroplasty surgery (THA) and whether patients with poor function before THA have the ability to recover less than those with less preoperative disability. ...
