**Diagnosing Lingual Airway Obstruction Using Nasopharyngeal Tube in OSAHS: Natural Sleep vs Induced Sleep**

Published On: March 24, 2017 | Pages: 027 - 031

Author(s): Shuhua Li*, Chunhai Shi, Dongmei Yu, Wancheng Chen and Dahai Wu

Objective: The goal of this study was to use the results from nasopharyngeal tube polysomnography (NPT-PSG) to detect glossopharyngeal airway obstruction in patients with obstructive sleep apnea hypopnea syndrome (OSAHS) and to compare the results with those obtained by observing sleep apnea/hypopnea after nasopharyngeal tube insertion during drug-induced sleep.

**Management of Cleft Lip and Palate: A Five Year Review**

Published On: February 24, 2017 | Pages: 023 - 026

Author(s): Emmanuel JK Adu* and Peter Donkor

Introduction: Clefts of the lip may cause cosmetic and social problems. Clefts of the palate may affect feeding, speech and hearing.

**The Evaluation of Hematologic and Platelet Function in Total Septum Reconstruction Patients**

Published On: January 28, 2017 | Pages: 017 - 021
Objective: Nasal septal deviation is a common disorder of the nose and patients commonly visit clinics with complaints of nasal obstruction. As a result of nasal obstruction, patients are exposed to snoring, which causes hypoxia. ...
Adenoid enlargement is uncommon in adults. We studied the varied presentation of adenoid hypertrophy in two adults. A 45 year old male who presented with nasal obstruction and snoring, and a 35 year old male who presented with non resolving chronic otitis media. ...
