Aggressive Thyroid Gland Carcinoma: A Case Series

Published On: December 29, 2017 | Pages: 129 - 137

Author(s): James P Dworkin-Valenti*, Esmael H Amjad, Noah Stern and Samba SR Bathula

In 2017 there were approximately 62000 new cases of thyroid cancer (TC) in the United States, with a death toll of less than 5%. This relatively low mortality rate is based on a grouping of all TC subtypes, which masks the small minority of patients with biologically aggressive tumors who have dismal prognoses for survival. ...

A Questionnaire Survey: Knowledge in Upper Airway Infections among General Practitioners in Malaysia

Published On: December 26, 2017 | Pages: 126 - 128

Author(s): Boon Han Kevin Ng*, Ing Ping Tang, Elizabeth Yenn Lynn Lim, Abu Bakar Zulkiflee and Prepargeran Narayanan

Background: Upper respiratory tract infections (URTI) cases are one of the most frequently seen cases in the primary care setting. The causative agents are either bacteria or virus. It is not easy to differentiate among them. In term of treatment for both conditions, certain principles of treatment are advised to be followed. ...

Effects of a plant based Biodegradable Middle Meatal Dressing after Endoscopic Sinus Surgery: A Prospective Comparative Study
