Aggressive Thyroid Gland Carcinoma: A Case Series

Published On: December 29, 2017 | Pages: 129 - 137

Author(s): James P Dworkin-Valenti*, Esmael H Amjad, Noah Stern and Samba SR Bathula

In 2017 there were approximately 62000 new cases of thyroid cancer (TC) in the United States, with a death toll of less than 5%. This relatively low mortality rate is based on a grouping of all TC subtypes, which masks the small minority of patients with biologically aggressive tumors who have dismal prognoses for survival. ...
Background: The benefit from biodegradable middle meatal dressings is well established, and includes improved wound healing, stabilization of the middle turbinate, reduced granulation tissue, and improved patient comfort. This study compares the outcomes of a 100% plant-based nasal dressing to a popular fully synthetic dressing in patients undergoing endoscopic si ...
