Hyperuricemia and global Cardiovascular Risk: State of the art and preventive prospects
Over the last years, scientific research has focused its interest on a potential role of hyperuricemia as cardiovascular risk factor; main interest has been directed to persistent raised plasma levels of uric acid.

**Review on Economic Importance’s of Rabies in Developing Countries and Its Controls**

Rabies is a zoonotic viral disease of mammals most often transmitted through the bite of a rabid animal. Warm blooded animals are susceptible to infection with rabies virus and are therefore possible reservoirs.

**Cross-Reactivity of Non-Neutralizing Antibodies to Dengue and Zika Viruses: Implications for Vaccination**

Dengue is the leading vector-borne viral disease of humans and poses a major international public health concern in tropical and subtropical regions in which it is endemic.
