A retrospective analysis of severe asthma treatment with Mepolizumab

Author(s): Mattia Serao*, Rossana Vigliarolo, Tiziana Trequattrini, Angela Succu, Marianna Lilli, Rosario Rivitti, Aldo Ciani, Giulia Cacciani, Sara Mannucci and Maria Cristina Zappa

Among the different types of bronchial asthma, the allergic one is certainly the most easily found. Allergic asthma is characterized by the presence of IgE antibodies called “reagine”, responsible for triggering respiratory allergic crises in the presence of perennial or seasonal specific allergens. ...
A foreign body aspiration presenting as left sided empyema and its removal by novel method

Published On: August 12, 2019 | Pages: 012 - 014

Author(s): Ramniwas*, Gopal Chawla, Nishant Kumar Chauhan and Naveen Dutt

Foreign body aspiration is not very common in adults, clinically, patients either present with acute respiratory failure which require immediate intervention or with recent onset of symptoms, like wheezing, breathlessness, coughing, and expectoration. ...

Micropapillary Adenocarcinoma of the lung: Recent updates and literature review

Published On: January 10, 2019 | Pages: 001 - 011

Author(s): Paloma del C Monroig-Bosque, Ahmed N Shehabeldin, and Jae Y Ro*

Background: Lung cancer is the most frequent cause of cancer-related death worldwide. For adenocarcinomas, histological subtyping is typically performed (e.g. lepidic, acinar, papillary, micropapillary, and solid), as suggested by the World Health Organization. Among these, micropapillary carcinoma has been a focus of significant research in recent years, as it is the ...

Ultrasound elastography: A new tool in pulmonology

Published On: November 19, 2019 | Pages: 027 - 028

Author(s): Maria Morales-Gonzalez and Aurelio Arnedillo*

Lung cancer continues being a serious cause of death in developed countries with an increase in its incidence in recent years. According to the above, it is not uncommon to think that new techniques are being investigated to facilitate
diagnosis, as well as its staging. ...
