Therapeutic approach with anabolic steroids in chronic obstructive pulmonary disease: Their role in improving patients’ quality of life

Published On: April 22, 2020 | Pages: 007 - 011

Author(s): Davi M Vidal, Lucas ANS Fonseca, Pedro C Morato Filho and Artur Laizo*

Introduction: Aging can be defined like a progressive and irreversible natural process. Chronic smoking shows the healthcare absence, 47% male smoking and 12% female smoking. Cigarette contains more than 4000 substances, in which 50 can develop neoplasm and many varied comorbidities like pituitary, thyroid, adrenal and gonadotrophic mismatch. It also affects calcium ...

Correlation of clinical, radiologic and pathologic manifestations with prognosis in lung cancer patients

Published On: February 05, 2020 | Pages: 001 - 006

Author(s): Halil Yanardag, Cuneyt Tetikkurt*, Cigdem Papila, Muammer Bilir and Seza Tetikkurt

Many different factors that are extremely variable for each individual affect the survival of lung cancer patients. Prognosis in lung cancer depends upon tumor type, patient immunity and treatment modalities. The objective of our study was to determine the influence of clinical manifestations including the patient symptoms, laboratory findings, imaging modalities and ...

Medical Science uses the medicines and probiotics for the respiratory diseases. For example for the current novel Corona virus infection management medicines, masks, gloves, goggles, regular hand cleaning and social distancing are being used across the world to prevent and control the spread of respiratory droplet infection. Covid 19 is severe acute respiratory corona...
