**The Promise of Disease Management in Greece**

Published On: March 30, 2017 | Pages: 018 - 025

Author(s): Konstantinos Stamatiou, Richard Lacroix, Eleni Almpani, Konstantinos Katsanos, Georgios Tzitzikos and Maria Saridi*

Background: Disease Management (DM) is an approach to health care that coordinates resources across the entire health care delivery system and throughout the course of a disease. ...

**Is it Time for the Introduction of Colostomy Free Survival in Rectal Cancer Patients**

Published On: February 28, 2017 | Pages: 004 - 007

Author(s): Mostafa El Haddad*

The rectum is considered the straight part of the bowel although it’s not straight with at least three folds. Sometimes defined as the last 12 cm of the large bowel other consider it as the last 15 cm. Surgeons mark it starting at the anorectal ring, anatomist use the dentate line, more consensus and agreements is needed for the rectum as a structure. ...

**Angiosarcoma of the Scalp and Face: A Hard to Treat Tumor**
Cutaneous angiosarcoma is a rare and aggressive malignant tumor of vascular origin. Multimodality treatment including surgery, radiotherapy and chemotherapy should be used according to age and local spread. Prognosis is poor with a 5-year survival of 10-15%. We report the case of an angiosarcoma of the scalp and face treated with sequential contact radiotherapy and ...

**Abrikossoff's Tumour Mimicking a Neoplastic Tumour of the Breast: A Case Report**

Introduction: Granular cell tumours (GCT), also known as Abrikossoff's tumours, are rare, and occur in the breast in approximately 5-6% of the cases these tumours are usually benign with only 1% of malignancy. ...

**Primary Spindle Cell Rhabdomyosarcoma of Prostate: A Case Report with Review of Literature**

Primary spindle cell rhabdomyosarcoma of the prostate is an uncommon variant of embryonal rhabdomyosarcoma seen in pediatric age group mostly during infancy and childhood. Rhabdomyosarcoma (RMS) arising from prostate predominantly presents obstructive urinary symptoms. ...
The Role of Decavanadate in Anti-Tumour Activity

Published On: March 11, 2017 | Pages: 012 - 014

Author(s): M Aureliano*

Decavanadate compounds were described to be involved in a variety of biological activities and responses such as anti-virus, anti-bacterial and anticancer. While the mechanisms of action of the antiviral and anti-bacterial activities are better understood, the same does not go for the anti-tumour activity. ...

MEK Inhibitors in Combination with Immune Checkpoint Inhibition: Should we be Chasing Colorectal Cancer or the KRAS Mutant Cancer

Published On: May 26, 2017 | Pages: 030 - 031

Author(s): Julius Strauss*

In the past few years, immunotherapy, particularly immune checkpoint inhibitors, have redefined standard of care cancer treatment for numerous malignancies. However, despite the wealth of promising data and great enthusiasm, the vast majority of cancer patients still fail to respond to these therapies as single agents. ...

Video Endoscopic Inguinal Lymphadenectomy: Refining surgical technique after ten years experience

Published On: December 30, 2017 | Pages: 034 - 037

Author(s): Marcos Tobias-Machado, Pericles Rios Auad*, Victor Corona, Igor Silva, Oseas de Castro Neves, Eliney Ferreira Faria, Pablo Matos, Alexandre Cesar Santos, Roberto Machado, Aurus Dourado and Hamilton de Campos Zampolli

Penile carcinoma is a rare malignant disease with a significantly higher incidence in some areas of underdeveloped countries [1]. Inguinal nodal involvement is found in 20% to 40% of cases at diagnosis and nodal metastasis is an important predictive factor for survival [2,3]. Metastatic penile carcinoma has an extremely poor prognosis, ...
