**Angiosarcoma of the Scalp and Face: A Hard to Treat Tumor**
Cutaneous angiosarcoma is a rare and aggressive malignant tumor of vascular origin. Multimodality treatment including surgery, radiotherapy and chemotherapy should be used according to age and local spread. Prognosis is poor with a 5-year survival of 10-15%. We report the case of an angiosarcoma of the scalp and face treated with sequential contact radiotherapy and ...

**Short Communication**
The Role of Decavanadate in Anti-Tumour Activity

Published On: March 11, 2017 | Pages: 012 - 014

Author(s): M Aureliano*

Decavanadate compounds were described to be involved in a variety of biological activities and responses such as anti-virus, anti-bacterial and anticancer. While the mechanisms of action of the antiviral and anti-bacterial activities are better understood, the same does not go for the anti-tumour activity. ...
MEK Inhibitors in Combination with Immune Checkpoint Inhibition: Should we be Chasing Colorectal Cancer or the KRAS Mutant Cancer

Published On: May 26, 2017 | Pages: 030 - 031

Author(s): Julius Strauss*

In the past few years, immunotherapy, particularly immune checkpoint inhibitors, have redefined standard of care cancer treatment for numerous malignancies. However, despite the wealth of promising data and great enthusiasm, the vast majority of cancer patients still fail to respond to these therapies as single agents. ...

Video Endoscopic Inguinal Lymphadenectomy: Refining surgical technique after ten years experience

Published On: December 30, 2017 | Pages: 034 - 037

Author(s): Marcos Tobias-Machado, Pericles Rios Auad*, Victor Corona, Igor Silva, Oseas de Castro Neves, Eliney Ferreira Faria, Pablo Matos, Alexandre Cesar Santos, Roberto Machado, Aurus Dourado and Hamilton de Campos Zampolli

Penile carcinoma is a rare malignant disease with a significantly higher incidence in some areas of underdeveloped countries [1]. Inguinal nodal involvement is found in 20% to 40% of cases at diagnosis and nodal metastasis is an important predictive factor for survival [2,3]. Metastatic penile carcinoma has an extremely poor prognosis, ...
