An Innovative New Treatment for Asherman Syndrome with an Intrauterine Amniograft: A Case Series

Published On: December 30, 2016 | Pages: 016 - 019

Author(s): Gretchen Garbe Collins*, Suruchi Thakore, Bansari Patel and James Liu

Objective: To determine if placing a cryopreserved amniotic membrane product (AmnioGraft) at the time of hysteroscopic treatment for Asherman syndrome will promote regeneration of the endometrium. ...

Periodontitis and Infertility: An Evidence-Based Review

Published On: October 14, 2016 | Pages: 011 - 015

Author(s): Mariana Fampa Fogacci *, Davi da Silva Barbirato, Monique Oliveira Rodrigues, Cristine da Silva Furtado Amaral, and Denise P Carvalho

Periodontal diseases are initiated by a pathogenic biofilm, in a susceptible host, affecting the tooth periodontium. Its possible association with many biologic systems has been studied. In this evidence-based review, a comprehensive literature search was carried out to assess if there is an association between periodontal diseases and female infertility. ...

Chromosomal Aberrations in Turkish Infertile Couples with Reproductive Problems

Published On: July 18, 2016 | Pages: 006 - 010
Aim of the study: Infertility is a relatively common health condition, affecting nearly 15% of all couples, and has been estimated that nearly 50% of infertility cases are due to genetic defects.

**Novel Scientific Methods and Technology in the Reproductive Medicine**

Published On: May 26, 2016 | Pages: 001 - 005

Author(s): Teresa Wiesak * and Ewelina Goryszewska

Objectives: The objective of this review is to provide synopsis on the latest technology and scientific achievements that have found application in the reproductive medicine.
