An Innovative New Treatment for Asherman Syndrome with an Intrauterine Amniograft: A Case Series

An Innovative New Treatment for Asherman Syndrome with an Intrauterine Amniograft: A Case Series
Published On: December 30, 2016 | Pages: 016 - 019
Author(s): Gretchen Garbe Collins*, Suruchi Thakore, Bansari Patel and James Liu
Objective: To determine if placing a cryopreserved amniotic membrane product (AmnioGraft) at the time of hysteroscopic treatment for Asherman syndrome will promote regeneration of the endometrium. ...
Aim of the study: Infertility is a relatively common health condition, affecting nearly 15% of all couples, and has been estimated that nearly 50% of infertility cases are due to genetic defects.

Novel Scientific Methods and Technology in the Reproductive Medicine

Published On: May 26, 2016 | Pages: 001 - 005

Objectives: The objective of this review is to provide synopsis on the latest technology and scientific achievements that have found application in the reproductive medicine.
