Presumptive diagnosis of brucellosis and determination of risk factors for seropositivity among members of cattle keeping households in a high cattle traffic area in the South Western region of Uganda

Published On: August 27, 2019 | Pages: 016 - 024

Author(s): Arnold Ezama*, Jean-Paul Gonzalez, Tesfaalem Tekleghiorghis Sebhatu, Tumwine Gabriel, Samuel Majalija and Francis Bajuniwwe

Brucellosis is worldwide and affects human, cattle health and international trade. Human Brucella seroprevalence in Ugandan communities is not well known since most of the health centers are not able to screen for brucellosis. The study presumptively determined: seroprevalence, identified risk factors associated with Brucella infection in cattle keeping household ...

Study of Immunogenicity and Protective Efficacy of Live MDCK-derived Pandemic Influenza Vaccine

Published On: June 06, 2019 | Pages: 010 - 015

Author(s): Elena A Nechaeva*, Ryzhikov AB, Pyankova OG, Radaeva IF, Pyankov OV, Danilchenko NV, Agafonov AP, Kiseleva LV, Larionova NV and Rudenko LG

Background: The threat of pandemic A/H1N1 influenza is still a matter of considerable public concern. Influenza outbreak in 2009 underlined the importance of rapid production of a sufficient vaccine reserve for pandemic and interpandemic periods. One promising way to allay this concern is development of cell culture-derived live attenuated influenza vaccines (LAIV), b ...
Clinical profile of Dengue infection at a center in north Karnataka, India
