Background: A patient’s motivation for consulting a physician is paramount to the first steps of achieving an early diagnosis of hereditary angioedema (HAE). Understanding what triggers this motivation can help in the design of strategies to increase the number of visits to a specialist physician following early symptoms of HAE. The aim of the present study was to ide ...

The Role of Dr. Colonel Vance H. Marchbanks in developing an oxygen delivery system: A “Forgotten First” in Aviation and Aerospace

Published On: June 30, 2018 | Pages: 016 - 018

In our series of unsung or forgotten medical heroes, we first published a manuscript on Alvin Blunt, Jr, M.D. who was the first African American MASH physician in the Korean War. Dr. Kenneth L. Wilson’s manuscript changed United States military history. Our second manuscript in our series, Medical Miracle in Indianola, Mississippi: The Untold Story of Dr. Clinton Batt ...
