Case Report

Reversible blindness associated with severe Diabetic Ketoacidosis

Published On: September 07, 2017 | Pages: 066 - 067

Author(s): Jitendra Pareek and Jayesh Trivedi*

Diabetes mellitus is commonly associated with gradual onset of visual loss. Reversible acute blindness associated with diabetic ketoacidosis has been reported only once previously. Metformin associated blindness is common in type 2 diabetes patients but in type 1 diabetes patients gradual loss of vision is commonly due to proliferative diabetic retinopathy. ...
