Aarskog-Scott Syndrome: Clinico-Radiological Illustration of a Rare Case

Author(s): Akanksha Gupta, Ravi Prakash Sasankoti Mohan*, Sumit Goel and Swati Gupta

Aarskog-Scott Syndrome is a rare syndrome and is estimated to occur in 1 in 1 million individuals in general population. It is transmitted in an X-linked recessive manner and occurs due to FGD1 gene mutation. It has facial, genital and digital hands symptoms, musculoskeletal anomalies and affected growth. ...
Dilemma in Managing Thyroglossal Duct Cyst Carcinoma

Published On: December 12, 2016 | Pages: 001 - 003

Author(s): Sadia Ashraf*, Prashant Nadkarni, Roberto E Izquierdo and Nidhi Bansal

The thyroglossal duct cyst (TGDC) is a well-known developmental abnormality encountered in the neck. It represents over 75% of childhood midline neck masses and 7% of the adult population. It typically presents as a mobile, painless mass in the anterior midline of the neck, usually in close junction to the hyoid bone. ...
