generalized. This condition can be inflammatory, non-inflammatory or combination of both.

A Masquerading Case of IGRA Positive Mycobacterium Szulgai

Published On: April 03, 2017 | Pages: 009 - 010

Author(s): Grace Salame, Mohammed Abdulkadir Alhassen, Manjunath Muddaraju, Nirav Patel and Sowmya Nanjappa*

It is well known that Interferon-gamma release assays (IGRAs) are more specific than the purified protein derivative (PPD) skin tests in diagnosing tuberculosis as it is not confounded by prior bacillus Calmette-Guérin (BCG) vaccination.

Cowchock Wapner Kurtz Syndrome: Giant and Lethal Neck Cystic Hygroma: A Case Report

Published On: March 03, 2017 | Pages: 007 - 008

Author(s): Avina Fierro JA* and Hernandez Avina DA

Cowchock Wapner Kurtz syndrome is a very rare disease and lethal disorder with cervical lymphangioma obstructing the airway and causing complications, with accelerated growth resembling a teratoma.
