GG Polymorphism of Platelet ITGA2B Gene Increases the Magnitude of Interleukin-6 Release after Cardiopulmonary Bypass

Published On: December 30, 2016 | Pages: 024 - 029

Author(s): Koray Ak*, Samet Ergun, Hilal Altnoz, Z Oya Uyguner and Sermin Tetik

Objective: Cardiopulmonary bypass (CPB) induces a systemic inflammatory response which is thought to be a significant cause of postoperative organ dysfunction and mortality. In this study we aimed to investigate the effect of ITGA2B (integrin alpha 2b, platelet glycoprotein IIb of IIb/IIIa complex) gene polymorphism on the magnitude of inflammatory response after CPB ...

Testicular Ultrasound Assessment in Thalassemic Men

Published On: December 21, 2016 | Pages: 020 - 023

Author(s): Shahla Ansari, Mohammad Mahdi Allameh, Azadeh Kiumarsi* and Azita Azarkeivan

Objective: To evaluate testicular volume, varicocelle, hydrocelle, microlithiasis, semen parameters and measure serum FSH, LH, and Testosterone concentrations in young male thalassemic patients. ...

Mass Spectrometry Technology for Protein Biomarker Discovery
Human tissues and organs could be affected depending on pathological condition of diseases. Proteins are basic functioning molecules of cells accordingly to modification intensities. ...

**Coronary Artery Thrombosis Associated with Energy Drink Consumption**

Energy drinks have become readily available and are being utilized globally. However, the potential side effects of their use are not well understood. Most consumers use these beverages with the goal of increasing energy. ...

**Peritoneal Pseudocyst - A Complication of Lumbo Peritoneal Shunt Surgery**

Placement of a ventriculoperitoneal shunt is an established procedure for treatment of hydrocephalus, however, complications can occur. The most common causes of shunt malfunction are catheter obstruction and infection. The incidence of Ventriculoperitoneal shunt related abdominal complications has been reported to be from 5% to 47% [1]. The most common distal ventric ...
Klebsiella Pneumoniae Community-Acquired Pneumonia in a Trisomic at Omar Bongo Ondimba's Army Instruction Hospital (HIA OBO)

Published On: May 08, 2016 | Pages: 007 - 008

Author(s): D Mounguengui*, JM Mandji Lawson, H Birinda, M Ondounda, S Olivera, UD Kombila, LD Ibinga, JB Boguikouma

Kp community-acquired pneumonia is rarely encountered. Its prevalence is higher in Asia, where a higher strain virulence was demonstrated [1,2]. It's a pyo-pneumothorax, which usually occurs on debilitated or immuno-compromised patients. It is a severe disease associated with high mortality. Here, we report the observation of a Kp community-acquired pneumonia occurring ...

Negative Pressure Treatment for Abdominal Wall Pseudotumor Due to Fishbone Perforation

Published On: January 25, 2016 | Pages: 002 - 003

Author(s): Livideanu C*, Alassiri A, Paolino L, Martini F, Droz J, Fritsch S

The inadvertent swallowing of foreign bodies is common, but results in perforation of the gastrointestinal tract in less than 1% of cases [1]. Because any site of the gastrointestinal tract may be perforated by a foreign body, the clinical presentation may vary and mimic diverse medical conditions. Presentation may be early in the form of peritonitis or late in the f ...

Neuroimage of the Subventricular Zone Associated with Intrauterine Ischemic Infarction

Published On: November 29, 2016 | Pages: 012 - 013

Author(s): Ramos-Zuñiga R*, Rochin-Mozqueda JA, García-Mercado CJ

Introduction. Recent studies that characterize the subventricular zone (SVZ) have identified the role that it represents for
neurogenesis, neuromigration processes and the formation of cortical neural networks. There are two neurogenic niches in the adult human brain, the SVZ and the dentate gyrus of the hippocampus, where neural stem cells have a significant potential ...
Eight year-old child presented with two year history of dyspnoea on exertion. Clinical examination revealed a continuous murmur peaking in diastole. Two dimensional transthoracic echocardiography revealed a dilated left circumflex artery (LCX) in parasternal short axis view with enlarged right atrium (RA) and right ventricle (Figures 1A,B). Apical four chamber view de ...
