**Case Report**

**Invasive yeast infection in patient with Acute pancreatitis**

Invasive yeast infection is rising in patients hospitalised in intensive care. Their early diagnosis is problematic, although predictive models (Pitt's colonization index, Leon score and others) can be helpful when deciding to initiate treatment.

**That’s not Metastatic Thyroid Cancer: Patterns of Non-malignant Radioiodine Uptake**

Radioactive iodine (RAI) has been an integral part of the identification, surveillance, and treatment of the most common types of metastatic thyroid carcinoma since its first use in 1941.

**Severe Congestive Dysmenorrhea in an Adolescent**

Published On: December 05, 2017 | Pages: 011 - 012
A 16 year old girl presented with severe congestive dysmenorrhea shortly after the onset of menarche at 14 years of age. Menstrual cycles were otherwise regular with normal flow pattern. She was prescribed multiple NSAIDS, which provided minimal relief. ...
