Saturated Spectroscopy and Unsaturated Spectroscopy Comparative Study on Malignant and Benign Human Cancer Cells and Tissues with the Passage of Time under Synchrotron Radiation

Published On: February 15, 2018 | Pages: 001 - 007

Author(s): Alireza Heidari*

In the current study, we have experimentally and comparatively investigated and compared malignant human cancer cells and tissues before and after irradiating of synchrotron radiation using Saturated Spectroscopy and Unsaturated Spectroscopy, respectively. ...

Stress and Glucose metabolism: A Review

Published On: March 29, 2018 | Pages: 008 - 012

Author(s): Nirupama R, Barathi Rajaraman and Yajurvedi HN*

Stress is an inescapable fact of life. The perceived stress induces endocrine alterations characterized by the activation of hypothalamo-pituitary-adrenal axis and sympathetic adreno-medullary axis. The glucocorticoids and catecholamines which are secreted in response to stress induce variations in the physiology and behavior that help the individual to adapt to ch...
