Multiple linear regressions on determinants of ginger production in yeki district, Sheka Zone, South West Ethiopia

Published On: September 02, 2020 | Pages: 151 - 156

Author(s): Alemu Bekele Eticha*

Ginger is an important crop that is produced worldwide for both spice and medicine. Ethiopia is one of the sub-Saharan countries which cultivate and export ginger to other countries. Even though ginger is an essential spice in the country, constraint faced during production reduces its output. Thus, this study aimed to identify the determinants of ginger production in ...

Vulnerability to food insecurity and coping strategies of agrarian households in the lower river region of the Gambia: Implication for policy

---

*Corresponding Author
This study assessed the extent of agrarian households’ vulnerability to food insecurity and coping strategies in the Lower River Region of The Gambia and implication for policy. The data was collected principally through questionnaires administered to 230 households and 10 key informants. Data was analysed using descriptive statistics with the aid of Statistical Packa ...
Review on some cereal and legume based composite biscuits

Published On: July 06, 2020 | Pages: 101 - 109

Author(s): Milkesa Feyera*

The major determinants of malnutrition in Africa are low availability of nutritious foods and inadequate consumption of protein-rich diets. Consumption of nutritious snacks could help to reduce protein-energy malnutrition in children and adults. Biscuits are a ready-to-eat, convenient and cheap snack that is consumed by all age group in many countries. It can be prod ...
