**[Apparent Digestibility and Utilization of Protein and Phosphorus in diets of incorporated with Sprouted Sorghum, Phytase and Protease Enzymes for African Catfish \(Clarias gariepinus\)](#)**

Published On: November 24, 2017 | Pages: 077 - 087

Author(s): Kemigabo C\*, Kang'ombe J, Jere LW, Sikawa D and Masembe C

Apparent digestibility, deposition and retention of crude protein and phosphorus were determined for 30%, 35%, 50% and 55% CP diets incorporated with sprouted sorghum, 750, 1000 and 1250 units/kg-1 phytase and protease enzymes, fed to African catfish fingerlings. ...

**[Characteristics and Status of the Highland Lake Hashenge Fishery, Tigray, Northern Ethiopia](#)**

Published On: November 13, 2017 | Pages: 071 - 076

Author(s): Tsegay Teame\*

The study was intended to show the characteristics and the status of fishery in Lake Hashenge. Assessment of fishing practices was done by using questionnaires. Physico-chemical parameters of the lake water shows optimum for fish growth. In the lake there are three fish species of those two are economically important fish species. ...
