[Effects of water depth on growth performance of Indian major carps at a poly culture system in Bangladesh](#)

Published On: August 05, 2019 | Pages: 014 - 021

Author(s): Md Hafi z All Hosen, Koushik Sarker, Mousumi Sarker Chhanda* and Nipa Gupta

The main aim of this study was to assess the effect of water depth on the growth performance (length and weight) of table size Indian major carp (Gibelion catla, Labeo rohita, and Cirrhinus mrigala) fishes. Fishes were recorded under different depth (1.20 m, 1.80 m and 2.80 m) for about eight months from February 2016 to September 2016. Water depth was considered as ...
