Recombinant Growth hormone response in Indian girls with Turner syndrome

Published On: October 29, 2018 | Pages: 001 - 003

Author(s): Inderpal Singh Kochar*, Smita Ramachandran and Aashish Sethi

Turner syndrome (TS) is characterized by short stature and ovarian dysgenesis in females with one X chromosome and partial or complete absence of the second X. It has an estimated birth prevalence of 1/2000 to 1/5000 female live births [1]. There is a global growth delay in TS characterized by slight intrauterine growth retardation, delayed growth during infancy and c ...

Parathyroid adenoma-An incidental diagnosis

Published On: December 18, 2018 | Pages: 012 - 013

Author(s): Nandini Chatterjee and Chandan Chatterjee*

A 50 year old man was referred to us with inadequate control of blood pressure for last few years. He was being treated as a case of essential hypertension on a four drug regime. Subsequent work up led to the diagnosis of primary hyperparathyroidism due to left inferior parathyroid adenoma. ...

Two cases of traumatic isolated ACTH deficiency
Case 1: A 65-year-old man was accidentally injured by a wooden hammer on his top of head 34 years before. He was suffering from vomiting, diarrhea, and hypotension, and the laboratory examination revealed increased CRP level, hyponatremia, and decreased plasma cortisol and ACTH levels, suggesting isolated ACTH deficiency and Crohn disease diagnosed by colonoscopic biopsy ...

**Closing the Mortality Gap in Diabetic Ketoacidosis and Hyperosmolar Hyperglycemic State: Implications of a Clinical Decision Support App**

Diabetes is a major public health issue affecting millions of people in the United States and worldwide. In the United States alone, about 30.3 million people (9.4% of the population) have diabetes [1]. Worldwide, a staggering 422 million people have diabetes according to 2014 estimates [2]. Diabetes complications over years of exposure include cardiovascular disease -- stro...
