**Simulation of the Behavior of Carbon Nanotori during Unfolding: A Study of Stability and Electronic Structure**

Published On: January 29, 2018 | Pages: 004 - 008

Author(s): Olga E Glukhova* and Michael M Slepchenkov

In this work, we present an in silico study of the dynamic behavior of a carbon nanotorus during the localized breaking of the C-C bonds in its atomic network. It is shown that the unfolding of a carbon nanotorus is accompanied by the appearance of deformation waves running along the atomic network of the carbon structure. We estimate energy stability of a carbon n ...

**Sintering process and catalysis**

Published On: January 08, 2018 | Pages: 001 - 003

Author(s): Nasrallah M Deraz*

Sintering process has strong effect on the active surface area and catalytically active sites involved the catalyst. This process has two mechanisms depending on the thermal diffusion of the constituents of catalysts. ...
