Multiple sclerosis and eye: Geometric complexity of the optic nerve head microvasculature-a pilot study

Published On: February 07, 2020 | Pages: 004 - 007

Author(s): G Bianciardi* and C Traversi

Multiple Sclerosis (MS) is a progressive neurodegenerative disease of the central nervous system characterized by focal demyelinating lesions in the white matter of the brain or spinal cord. When MS affects the nerves in a person’s eyes, it can cause Optic Neuritis (ON). We have investigated the microvascular pattern of the nerve head performing the evaluation of its ...

Concept of root resection of single rooted teeth: Case report with 8-months follow-up

Published On: January 21, 2020 | Pages: 001 - 003

Author(s): Amit Arvind Agrawal

Purpose: We have a high percentage of ageing population that is extensively restored. As the number of restorations will increase so will the chances of restoration failure; subsequently their management will become an ever-increasing challenge to the profession. In cases of Fixed Partial Denture (FPD) supported by multiple abutments or Multiple Connected Full-Coverag ...
