Second-birth fertility desire and social factors in married women in Zhejiang province, China: A cross-sectional study

Published On: April 24, 2020 | Pages: 012 - 016

Author(s): Chunyan Zhou, Haiyan Xing* and Wei YU

Background: After the universal two-child policy in China, the Second-Birth Fertility Desire (SBFD) has aroused widespread concern. There have been some research on SBFD, however, current reports on social factors and SBFD are not detailed. The objective was to investigate the impact of social factors on SBFD and to explore correlation between them. Methods: By strat ...
Introduction: Peyronie’s disease is an acquired fibrosis of the corpora cavernosa which causes deformation of the penis and represents one of the causes of erectile insufficiency with serious consequences for the life of a couple. The diagnosis is clinical and the treatment is medico-surgical. Objective: Evaluation of the sexuality of patients with Peyronie’s disease...
