Incompetent Perforator Veins; To treat or not to treat

Published On: January 24, 2019 | Pages: 001 - 004

Author(s): Thilina Gunawardena* and Nalaka Gunawansa

The role of perforator vein incompetence (PVI) in the development of venous hypertension, chronic venous insufficiency (CVI) and ulceration has been well recognized for over a century. However, while minimally invasive endovenous ablative therapies have revolutionized the management of superficial truncal vein insufficiency, the definitive indications for intervention ...
