Recanalization of long iliac occlusions by humeral and radial approach- About 30 cases

Published On: March 12, 2019 | Pages: 005 - 008

Author(s): Aabdou A*, Ezzahraoui MR, Almahraoui O and Alaoui M

Background: Complex stenosis and iliac occlusions (TASC C-D) often require surgical revascularization. Since 2007, several studies have studied the performance of endovascular revascularizations via brachial or radial anterograde approach with a good success rate. Material and methods: We performed a retrospective and analytical study, comprising a series of 30 patie ...

Incompetent Perforator Veins; To treat or not to treat

Published On: January 24, 2019 | Pages: 001 - 004

Author(s): Thilina Gunawardena* and Nalaka Gunawansa

The role of perforator vein incompetence (PVI) in the development of venous hypertension, chronic venous insufficiency (CVI) and ulceration has been well recognized for over a century. However, while minimally invasive endovenous ablative therapies have revolutionized the management of superficial truncal vein insufficiency, the definitive indications for intervention ...
