Antithrombotic therapy and clinical characteristics of patients hospitalized for nonvalvular atrial fibrillation in Galician internal medicine clinics

Published On: November 25, 2019 | Pages: 076 - 081

Author(s): Jose Manuel Cerqueiro-Gonzalez*, Elena Fernandez-Bouza, Manuel Lorenzo Lopez-Reboiro, Paula Pesqueira-Fontan, Patricia Vazquez-Rodriguez, Ignacio Novo-Veleiro and Emilio Casariego-Vales

This was a multicenter, prospective, observational study that assessed the characteristics of patients with Nonvalvular Atrial Fibrillation (NVAF) admitted to internal medicine units in Galicia, Spain, as well as the antithrombotic treatment prescribed prior to hospital admission. ...

Coronary angiographic profile in patients with failed thrombolysis

Published On: November 15, 2019 | Pages: 069 - 073

Author(s): Saravanan M, Vinodkumar Balakrishnan* and Muralidharan TR

Background: Acute Myocardial Infarction (MI) is a life threatening condition responsible for over 85% of the deaths all over the world. The management of MI has to be done on an emergency footing, without losing any time. The standard protocol involves thrombolysis in these patients. However, not all the thrombolysis procedures turn out to be successful. This study wa ...
Blood warming in trauma related transfusions-Precepts and practices

Published On: December 24, 2019 | Pages: 094 - 097

Author(s): Indrani Ghosh and Rudrashish Haldar*

Trauma patients often have a high incidence of hypothermia which is secondary to prolonged exposures, surgery and anaesthesia induced alteration of thermal homeostasis and infusion of cold fluids during resuscitation. Transfusion of red blood cells and blood products (except platelets) which are stored at low temperatures compound the situation by causing a further de ...

Stress (Tako-tsubo) cardiomyopathy: Review

Published On: November 19, 2019 | Pages: 074 - 075
