Study on Innovative Scenario for Transportation and Lowering of 18000 Ton Caisson for Persian Gulf Bridge

Published On: November 06, 2015 | Pages: 028 - 031

Author(s): AB Toroodi, MM Abaiee* and A Ahmadi

This paper aims to provide an innovative scenario for transportation and lowering installation of heavy caissons of 18000 tons for Persian Gulf Bridge. The project is supposed to be carried on in Bohal port from Hormozgan to Qeshm Island in Iran. There is a heated controversy over the suitable scenario to do the operation safely and lower the caissons correctly under ...

Chemistry in Civil Engineering-New Products and Applications

The field of civil engineering is ever expanding where technology grows and advances at a very fast pace. Newer constructional materials are introduced every year to cater to these needs. There are certain naturally occurring cement types that have been found to bear many useful properties such as increased strength and workability and/or reduction in bleeding, segreg ...

Six Sigma DMAIC for Shaking Stagnant Construction Cultures – A Conceptual Perspective
Cultural barrier is always perceived as the prime challenge for modernizing idle construction markets. Unsurprisingly, most changes in construction hinge on understanding the benefits of sustainable transformation. Persistent attempts in stagnant construction cultures have materialized in some noted changes. Successful sustainable transformation in such economies appe ...
Disseminate Research in Science, Technology, Engineering and Mathematics (STEM) that Help in Creating Constructive Solutions in a Context of National and International Regulations

Welcome to the open access, multi disciplines Journal of Civil Engineering and Environmental Sciences (JCEES). We are delighted to announce that all the original work in the engineering, sciences and environment can be covered under the scope of JCEES. In the Civil Engineering and Environmental Science, we are bringing together the new ideas of different research a ...
