Cuban Ocular Toxoplasmosis Epidemiology Study (COTES): Clinical Features in 279 Patients from Central Cuba

Abstract View | Full Article View | DOI: 10.17352/2455-1414.000032

Relationship of Serum HbA1c and Fasting Serum Lipids with Central Macular Thickness in Patients with Type 2 Diabetes Mellitus

Abstract View | Full Article View | DOI: 10.17352/2455-1414.000031
Author(s): Ayse Gul Kocak Altintas*, Mehmet Citirik and Bayram Gulpamuk
Background: Diabetic retinopathy, the most common retinal vascular disease, is the leading cause of new-blindness in adults during the third through sixth decades of life. ...

Role of Radiation Therapy for Choroidal Hemangioma: A Brief Review

Author(s): Kiran Turaka, Aruna Turaka* and Bobby N Koneru
Choroidal hemangioma is an uncommon benign vascular hamartoma. Depending on the extent of the involved choroid, it can be subtyped into circumscribed form that occurs sporadically as an isolated tumor or a diffuse form that occurs in association with Sturge-Weber syndrome. ...

Atypical Presentation of Uveal and Conjunctival Melanoma in the Anterior Segment

Author(s): Alina Djougarian*, I Rand Rodgers and Alan H Friedman
Ocular melanoma is a rare malignancy arising from melanocytes of the uvea, the conjunctiva, and the orbit. Uveal melanoma is the most common intraocular malignancy in adults, accounting for 85-95% of ocular melanomas [1-3]. ...
