Ocular tuberculosis: Clinicopathologic assortment and diagnostic challenges

Published On: June 06, 2019 | Pages: 011 - 020

Author(s): Priyatam Khadka* and Ranju Kharel

Ocular tuberculosis is an exigent clinical entity—lacking a distinct clinical presentation and attributing the diagnostic conundrum. Nevertheless, the early-precise diagnosis with implicated anti-tubercular therapy may be sight-saving; diagnostic delays often encountered due to protean clinical presentations, the impracticability of obtaining tissue (in most case), li ...
