Beta-carotene status are co-related with pupillary diameter changes in obese & normal adults in relation to prediction of heart disease

Published On: September 29, 2019 | Pages: 031 - 035

Author(s): Muhammad Jaffar Khan, Usama*, Summaya Hanif and Sadia Fatima

Several studies have been conducted by antioxidant properties of the Beta-carotenes in relation to their ability like prevention to coronary diseases. Similarly, 3 out of 4 randomized studies have shown that higher intakes or higher blood concentrations of -carotenes are associated with the reduced risk of the Predictive Heart Disease (PHD). As vitamin A functions as ...

Paradoxical worsening of presumed tubercular seriginous like choroiditis on anti-tubercular therapy

Published On: July 12, 2019 | Pages: 028 - 030

Author(s): Priyanka1*, Amber Kumar2, Mahesh Maheshwari3 and Jyotirmay Biswas4

Choroidal tuberculosis may present as multifocal progressive or seriginous like choroiditis. It is important to recognize these presentations as these eyes show good response to systemic antitubercular therapy. Paradoxical reaction in tuberculosis can occur in patients receiving antituberculous therapy (ATT). ...
