In the temporomandibular joint (TMJ) with physiological disc position, the disc rotates posteriorly on the condyle to the maximum degree and the condyle translates to the maximum degree, which occurs simultaneously at the maximum mouth opening movement. Condylar hypermobility in the position of maximally open mouth leads to the subluxation of the joint, and the two te ...
Quite often it is a source of amusement and quite often it is hushed up: SNORING! One third of the adult population snores and knows the problems in everyday life which result from snoring. However, what a lot of people do not know is that snoring can be one indication of a serious health problem called obstructive sleep apnea (OSA).

Erosive Mucosa

Sir, I want to share with your readers a case of erosive mucosal lesion due to the use of Neem juice. A patient reported with severe burning sensation intra-orally on the right posterior region. On examination, we found erosive lesions on the buccal mucosa (Figure 1). The right mandibular molars had silver amalgam restorations of eight years standing. Patient medical...
