Prevention of Brachial Plexus Injuries at Birth

Published On: June 29, 2015 | Pages: 001 - 005

Author(s): Leslie Iffy*

Medicine is a fast evolving even if inexact science. Built in ancient times upon insightful observations of Egyptian, Greek and Arabic physicians [11. Lyons AS, Petrucelli RJ II (1978) Medicine. An Illustrated History. Harry N. Abrams, Inc., New York.], its progress was spearheaded by European (mainly British, French, German and Austrian) scientists after the middle a ...

Hospital Acquired Obstetrical Infections

Published On: December 28, 2015 | Pages: 017 - 021
“One drop of its water reflects the whole ocean.” The December 2, 2015 issue of the “American Medical Association Morning Rounds” reminded me to this old dictum. It announced that as a result of coordinated efforts by several national health care agencies, the rate of hospital acquired conditions diminished by 17% during the years of 2010 - 2014.

**Adult Granulosa Cell Tumours of the Ovary Seven Case Reports**

Published On: December 24, 2015 | Pages: 013 - 016

Author(s): Faten LIAMIEM*, Saloua MEJRI, Imen KHELIL, Ahlem LAHMAR, Saadia BOURAOUI, Sabeh MZABI-REGAYA

Background: Ovarian granulosa cell tumours are low-grade malignant sex cord-stromal tumours. They represent 2 to 3% of all ovarian cancers and occur mainly within the adult population.

**Gestational Choriocarcinoma in a Jehovah’s Witness: A Case Report**

Published On: November 09, 2015 | Pages: 010 - 012

Author(s): Onyinye Onyeka Okonkwo, George Uchenna Eleje and John EN Okonkwo

Introduction: Due to strong religious faith and beliefs against blood transfusions, Jehovah’s Witness patients often pose tight spot for obstetrician-gynecologists. Myelosuppressive effects of chemotherapy in gynecology-oncology settings are additional source of worry.
