Average pubertal timing, characteristics and menstrual patterns of Nigerian girls: Implication for sex education

Published On: May 05, 2020 | Pages: 010 - 013

Author(s): Faith C Diorgu* and Kelechim N Diorgu

Introduction: Age at menarche reflects the beginning of sexual maturation and is affected by nutritional status and prevailing environmental conditions. This study examined the age at menarche, breast and pubic hair development of girls in Southern Nigeria and explored their menstrual pattern Method: A cross-sectional descriptive study design was adopted, with struct ...

Hematocolpos on imperforated hymen and acute urinary retention A rare disease

About seven observations and literature reviews

Published On: May 05, 2020 | Pages: 014 - 018

Author(s): M Lahfaoui*, H Benhaddou and F Ettaybi

Hymenal imperforation is a fairly rare malformation, and severe when ignored. Based on the literature data on this malformation, a retrospective study was conducted on 7 cases of haematocolpos on imperforated hymen, collected to the uro-visceral pediatric surgery departments, Children’s Hospital, Oujda-Rabat (MOROCCO), over a period from January 2011 to January 2019. ...
