Preoperative Prediction of the Difficulty of Laparoscopic Cholecystectomy

Published On: April 23, 2015 | Pages: 015 - 018

Author(s): Aly Saber*, Sameh T Abu-Elela, Khaled M shaalan and Adel R Al-Masry

Introduction: Preoperative complexity estimation helps deciding whether to proceed with a minimally invasive approach, perform an open procedure or make a referral to a more experienced surgeon. Laparoscopic cholecystectomy outcome is particularly affected by the presence and severity of inflammation, advancing age, male sex and greater BMI. ...

Local Administration of Insulin-like Growth Factor I into Silicon Rubber Chamber Improves Peripheral Nerve Repair in Rats

Published On: April 13, 2015 | Pages: 004 - 010

Author(s): Rahim Mohammadi*, Masoume Masoumi-Verki, Sima Ahsan and Keyvan Amini

Introduction: Organ reinnervation and functional recovery following peripheral nerve injury still remains a major challenge...
and return of functional recovery to the preinjured level rarely occurs. The aim was to evaluate the effect of locally administered insulin-like growth factor (IGF I) on nerve regeneration. ...
